

Hello Brian,

Just wanted to drop you a line regarding our consult and treatment we received in March of 2014. My wife had been struggling with issues ranging from a shoulder injured 4 years ago falling from a horse, to a stiff upper back which numerous chiropractors have failed to resolve. She is a Triathlete and has had other Long Term Chronic injuries that we thought were with us for good

After meeting you at a resort pool and having a great conversation, we were intrigued enough to give your techniques a try. We have gone through several sports doctors and trainers always with a lot of hope and followed by little actual result so our expectations were tempered.

From the start we were impressed, you were very professional. Time after time you would assess a problem, explain it to us, then proceed to manipulate the muscles and resolve the problem. Always explaining what you were doing and why, every explanation made perfect sense. You managed to find and work out every issue she had at the time.

We left feeling great about our experience and hoping the relief you provided would last at least a few days. We are now thrilled and amazed. The treatment has provided long lasting results and has changed our minds about having to live with chronic overuse injuries. We don't!

My wife has bought every book you suggested and now has an even better understanding of the techniques you used.

The most amazing thing is that more therapists are not up to speed with this! We look forward to our next visit to Florida and will definitely schedule appointments for both of us.

We can't thank you enough !  
Gary and Elaine
